

## **Residential Testimonial - HS48**

The Below letter was sent by a satisfied residential customer, for a unit bought 5/20/10

Hi Harold,

I had to go thru one more cleaning cycle on my shower to realize that the white build up on the glass has not been coming back (at least not like before). I really think that the Hydroflow device really works by destroying the cal carious crystals in the water pipes and prevents them from being deposited on my shower glass. I think that it might also be helping my energy consumption in my water heater too, but I did not measure any results.

Thanks!

Herb Chock
